Vessel restrictions due to Felixstowe Port's ongoing issues.

Dear Customer,

Further to our release / publication last week providing information surrounding the current difficult and challenging problems surrounding UK ports and general congestion,

we are advised, from various sources, that many of the main carriers running regular services to / from the Far East to the UK have taken the decision to restrict bookings and vessel calls to the UK.

CMA, Evergreen and Cosco have announced that they will not be accepting any UK cargo for at least the first 2 weeks of December. They will cancel any bookings already on hand for this period.

Maersk and Yang Ming have severely reduced capacity and are just about fully booked for the whole of December.

Major Southampton carriers, such as, ONE, YML, Hyundai and Hapag Lloyd are also running over capacity so space is becoming difficult to obtain with these carriers also.

As always, Raycole will continue to liaise with the carriers and our partners in the Far East and will strive to provide the highest level of service to all our customers during this difficult time and will circulate updated information when available.

Thank you for your understanding,

Many thanks,
Raycole Team
